

# Lumière Élevé

Software Engineer, Web Developer, System Administrator  
ble-m@ltgc.cc

## Summary

I am an experienced, passionate and adaptive JS developer with over a decade of experience, who prefer to defy precedences. I seek a position that can utilize my skills for the benefit of the masses.

## Experience

- Programming with JavaScript since 2013. Mostly vanilla web dev with web neutrality in mind.
- Linux system administration since 2019 with Debian-based distributions and Bash skills.

## Skills

- HTML5
- JavaScript
- CSS3
- Deno
- Bun
- Node.js
- Cloudflare Workers
- AlpineJS
- Browser Extensions
- Bash
- C#
- Docker
- Git
- Linux
- Markdown
- MediaWiki
- Go
- Java

## Featured Projects

- [Octavia](#) (lead developer): An event-driven multi-standard MIDI state-tracking library.
- [WingBlade](#) (lead developer): A unified abstraction layer for multiple JavaScript runtimes.
- [Eclipsed](#) (lead developer): A jailbroken EventSource/SSE implementation for JS.
- [Snowy](#) (lead developer): BroadcastChannel API backported to legacy browsers.
- [Bromite Block PoC](#): Cheap server-side fingerprinting of misconfigured privacy browsers.

## Personal Interests

- Software APIs (design, polyfill...)
- Linguistics (analysis, conversion...)
- Music (development of related projects)
- System interoperability
- Sound synthesis
- Privacy
- Anti-censorship (analysis, circumvention...)
- Decentralized systems
- Game development
